متن زیر را بخوانید و به سوال ها جواب کامل دهید.

Mercury is the smallest planet in the solar system and the nearest one to the sun. It is the fastest planet. Its speed is 48 Km/h. It goes around the sun every 88 days. It doesn't have any moon. The weather of Mercury is hot enough to burn everything in days. But it's very cold at nights. There are no seas, rivers or lakes on it, so you cannot live on it.

42. How fast does Mercury go around the sun?

43. Why nothing can live on Mercury?
