Mercury is the fastest planet in the solar system and the nearest one to the sun. It is the fastest planet of solar system because its speed is 48 km/ h. It goes around the sun every 88 days.

Mercury is like a small rocky ball in space. **It** doesn't have any moons. So Venus is the nearest planet to Mercury. The weather of Mercury is hot enough to burn everything in days and it's very very cold at night. All of Mercury's surface is dry and rocky. There are no seas, rivers, or lakes on it. So you cannot live on mercury, but if you go to mercury, you can see wonderful things there.

- What is Mercury like?

- Can we live on Mercury? Why?

- Which planet is the nearest to mercury?

- The word "it" in line 3 refers to .....

a. solar system      b. space      c. Mercury      d. moon

- Mercury is the fastest planet of solar system.      T      F

- Mercury is a wonderful planet.      T      F
